### CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

#### Listing of Claims:

1. (Previously Presented) An array of disposable diaper configurations designed to fit toddlers at different stages of development, the array comprising:
  - a disposable diaper configuration including a chassis designed with specific features to correspond to a toddler's walking stage,
  - a disposable diaper configuration including a chassis designed with specific features to correspond to a toddler's learning stage, and
  - a disposable diaper configuration including a chassis designed with specific features to correspond to a toddler's toilet training stage.
2. (Previously Presented) The array of disposable diaper configurations according to claim 1 wherein the toddler's walking stage comprises a phase wherein the toddlers are capable of standing and walking.
3. (Previously Presented) The array of disposable diaper configurations according to claim 2 wherein the specific features corresponding to a toddler's walking stage include flexible fasteners and high stretch sides to facilitate changing the toddler in a standing position.
4. (Previously Presented) The array of disposable diaper configurations according to claim 1 wherein the learning stage comprises a phase wherein the toddlers are capable of participating in a dressing experience.
5. (Previously Presented) The array of disposable diaper configurations according to claim 4 wherein the specific features corresponding to a toddler's learning stage

12. (Withdrawn) Method according to claim 11 wherein the specific features of the chassis corresponding to the at least three toddler stages of development include flexible fasteners facilitating a standing change for the walking stage, a pull on chassis designed to look like underwear to enable the toddler to participate in the dressing experience for the learning stage, and a wetness indicator that helps the toddler to recognize the discomfort associated with wetting for the training stage.
13. (Withdrawn) Method according to claim 12 wherein the indicia illustrating the walking phase exhibits a caregiver changing the disposable diaper while the toddler is standing, the indicia illustrating the learning phase illustrates a toddler pulling the diaper up like underpants as the toddler participates in the dressing experience, and indicia illustrating the training phase exhibits a toddler undergoing toilet training.
14. (Previously Presented) The array of disposable diaper configurations according to claim 1 wherein each stage of development includes indicia depicting a toddler wearing the chassis design corresponding to the stage of development.
15. (Previously Presented) An array of disposable diapers from a single manufacturer, the array comprising:
  - at least one first package of a first type of disposable diapers having a first chassis configuration and having indicia on the package depicting the first type of disposable diapers being worn on a toddler that is standing; and
  - at least one second package of a second type of disposable diapers having a second chassis configuration different from the first chassis configuration and having indicia on the package that suggests the second type of disposable diapers are useful for toilet training a toddler;wherein at least some of the diapers in the first package and at least some of the diapers in the second package are designed to fit the same size wearer.
